

CUT THE CORD.

CORDLESS RANDOM ORBITAL POLISHER / SANDER

- Can use it anywhere - no electrical cords to deal with
- 80 minutes of continuous use
- 1.5 hours to fully recharge
- Powerful - will not slow down under pressure
- 9mm Random orbital design results in no "cut throughs" or holograms (wheel marks)
- 3800 RPM is quick and efficient
- Excellent for sanding with any grit

Stand Polisher in upright position so polish pad will not get contaminated with dirt

Polisher sold as a kit including polisher, battery and charger. Or each component sold separately.

Excellent for removing scratches and minor defects. Produces a mirror gloss without holograms or wheel marks
