

TRAILER REPAIR PATCHES

Day or Night On-the-Road Repairs

These self-adhering, non-corrosive, waterproof patches are designed for quick repairs of skin punctures on aluminum and metal trailer panels and fiberglass roofs and FRP panels.

An easy peel-and-stick **White Aluminum Panel** patch application. Immediate readiness for the road after the patch is applied.

Flexible 90 degree bendability patches rounded trailer corners and roof edges.

The butyl rubber backing guarantees a non-corrosive waterproof seal.

The **Transparent Fiberglass Patch** repairs Kemplite® roofs and is FDA approved for repairing FRP panels on the interior of refrigerated trailers.
